

## Interested in production and management? Join our global Product Supply Graduate Programme in France

### A leadership pipeline programme in the manufacturing part of Novo Nordisk

#### The journey starts in September 2014

With the Product Supply Graduate Programme you can launch a lifechanging career and make a significant contribution.

#### High quality in a growing organisation

Novo Nordisk is a world leading company within diabetes care. Product Supply employs one third of the employees – all highly engaged in delivering quality products to more than 23,000 million patients yearly.

We play a vital role in the launch of new products in a changing market.

Product Supply is a growing organisation with production sites in Denmark, France, US, Brazil.

#### A rotational learning track

The programme scope is two years consisting of three 8-months rotations:

- 2 rotations in France, Chartres
- 1 rotation in headquarter Denmark

You will solve complex tasks in different areas of the supply chain while exploring diverse cultural settings. This is why our graduates are known for their broad business understanding and change readiness.

#### Lean and leadership development

You enter a dynamic organisation striving for continuous improvements in an ambitious learning environment. The programme provides you with tasks, training and feedback within lean and leadership to accelerate your development and strengthen your potential to take up a management position in the future.

#### Requirements

To join the Product Supply Graduate Programme in France you must hold a recently acquired master's degree in a relevant subject such as Engineering, Natural Sciences or Supply Chain Management. We are looking for curious top-of-the-class students with strong learning agility who like to take initiative and drive tangible results.

#### Apply before 9 February 2014

Please visit our website before writing your application to know the specific requirements and submit your motivational letter, CV and grade transcript by 9 February 2014 (in English).

#### Send all the documents to :

#### The French site in Product Supply

Novo Nordisk Production in Chartres produces insulin for diabetes patients in the entire world. The site was founded in 1961 and today it employs 800 employees. The site has been expanded three times and several innovative development projects have been managed, like the implementation of high speed filling lines. We are looking for graduates who will thrive in a dynamic environment and who aim for a local as well as a global career adding value to our French site and Novo Nordisk.

### About Novo Nordisk

Diabetes currently affects more than 366 million people. This number is expected to grow to 552 million by 2030.

At Novo Nordisk we employ more than 36,000 employees in 75 countries. Our culture is as diverse as our geographical spread, encouraging an open, honest, respectful, healthy and innovative environment.

Being a financially solid company with strong values, we have provided double-digit growth the previous 10 years and continue to expand.

The number of people with diabetes worldwide is growing at an alarming rate. It is expected that more than 550 million people will have diabetes by the year 2030.

Changing Diabetes® is Novo Nordisk's commitment to defeat the diabetes pandemic. Together with our global partners, we are working to raise awareness, improve access to care and address psychosocial aspects of diabetes to improve people's lives.
